Epson **ColorWorks C7500 (012)**

The C7500 is the ultimate in short-run colour label printing. Manufacturers can now reliably and cost-effectively meet their in-house labelling needs with outstanding speed and quality. The C7500 can also help eliminate the costs associated with pre-printing by producing short-run, customised labels on-demand.

Reliable and consistent results
The C7500 can help manufacturers produce consistent, high-quality labels in-house and on-demand. The printer features the new PrecisionCore printhead to ensure reliable, high-quality results. Our unique Nozzle Verification Technology (NVT) and dot substitution helps prevent misprints and dead pixels for consistent printouts.

Fast speeds
Produce a range of high-quality labels, fast including those for food and beverage products, packaging and boxes, as well as EU Energy Labels and GHS Labels. With print speeds of up to 300mm/sec, you can now print labels in full colour, at the same speed as some incumbent thermal monochrome printers.

Cost-effective
Printing labels on-demand with the C7500 will help eliminate the costs associated to pre-printing, such as label waste and large label inventory. High capacity, individual ink cartridges mean only the colour used will need to be replaced, offering very low cost per print. The printhead is designed to last for the lifetime of the printer[1], so you should never need to buy a replacement.

Easy to use with minimal maintenance
With its LCD control panel, setting up the C7500 couldn't be easier. Our newest printer command set, ESC/Label, allows printer integration with virtually any operating system. The device also comes with a full range of software utilities to support printer deployment. NVT also helps with self-maintenance to prevent clogged nozzles.
