Chapter 1: Introduction

The HX3 is a small, lightweight wearable voice computer. The HX3 is designed for use with voice applications while the user's hands are actively engaged with the physical environment, including piece picking to carts, containers or conveyers; case picking; parcel moves; and broken case activities.

The HX3 can be docked in the HX2 Cradle. The HX3 batteries can be re-charged while the HX3 is in the cradle. The batteries are also re-charged in the HX2 Battery Charger. When the HX3 is docked in a powered cradle, connection is broken between the tethered battery and the HX3. The HX3 begins receiving power through the powered cradle connector. It may be necessary to wake the HX3 from Suspend when it is inserted in the cradle.

Before you begin:

- 1. ActiveSync must be installed on a desktop/laptop PC with a USB port.
- 2. Connect the HX3 via a USB-Client cable to the PC.
- 3. Copy LXEConnect setup files from the HX3 to the PC.
- 4. Install and launch LXEConnect on the PC.

When HX3 configuration is complete, exit LXEConnect and disconnect the ActiveSync connection.

About this Guide

This HX3 User's Guide provides instruction for the end-user or system administrator to follow when setting up a new HX3. This user's guide has been developed for a HX3 with a Microsoft® Windows® CE 5 operating system.

Laser Warnings and Labels

- Do not look into the laser's lens.
- Do not stare directly into the laser beam.
- Do not remove the laser caution labels from the HX3.
- Do not connect the laser bar code aperture to any other device. The laser bar code aperture is certified for use with the HX3 only.

Caution

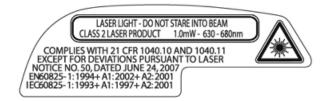

Laser radiation when open. Please read the caution labels. Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Ring Scanner and Ring Imager Caution Label - Class 2 Laser Scanner

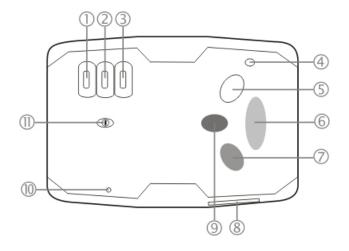

The laser light label is located on the side of the ring scanner and ring imager.

Label

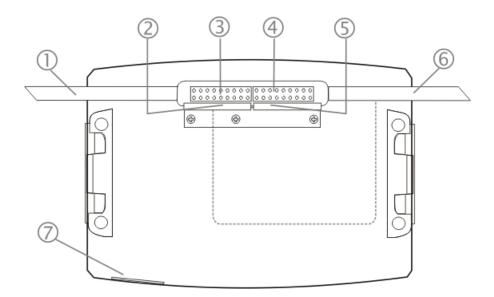

Components

Front

- 1. Wireless LED (Yellow)
- 2. Bluetooth LED (Blue)
- 3. System Status LED (Green or Red)
- 4. Speaker
- 5. White Button (Up Arrow)
- 6. Yellow Button (Enter)
- 7. Green Button (Down Arrow)

Connectors

Ring Scanner / Audio / Battery Connector

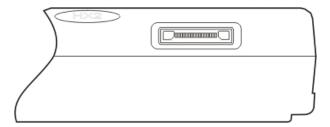

Connector 1 is on the left.

Connector 2 is on the right.

Both connectors attach to cables for:

- Tethered Ring Scanner (Laser or Imager)
- Tethered Headset / Microphone and Battery
- · Tethered Battery

Cradle Connector

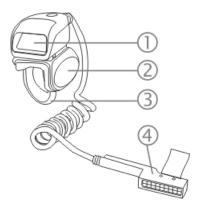

Connector 3 is at the base of the HX3. It connects to the Cradle. When the HX3 is in a powered cradle, the HX3 receives external power through the Cradle connector.

USB Keyboard or USB Mouse input is received through the Cradle connector when the HX3 is in the HX3cradle.

Ring Scanner and Ring Imager

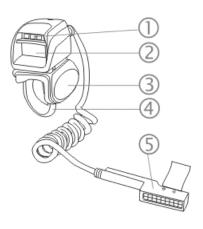

The trigger module and ring strap module are user replaceable.

Laser Scanner

- 1. Scan Window
- 2. Trigger
- 3. Ring Strap
- 4. Connector

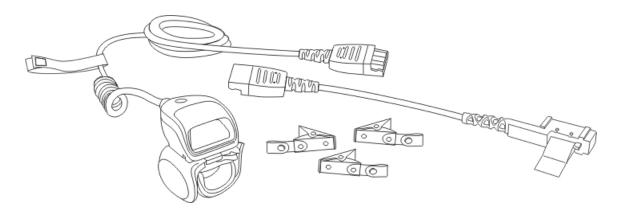

Laser Imager

- 1. Illumination LEDs
- 2. Scan Window
- 3. Trigger
- 4. Ring Strap
- 5. Connector

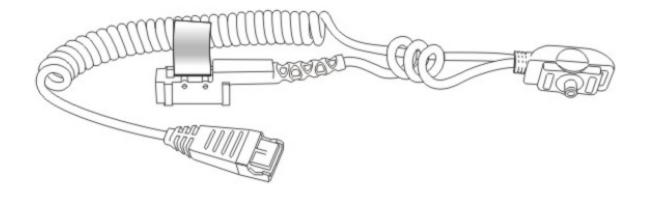

Cables

Ring Scanner and Ring Imager Extended Cable

Clips are used to secure the cable to clothing. Wristband is used to secure the cable to the user's wrist.

Audio Connector and Battery Connection Cable

Li-Ion Battery

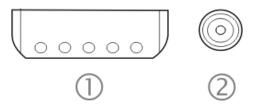

Main battery charging is handled exclusively by the HX3 Battery Charger/analyzer and the battery charger integrated into the HX3powered cradle.

The Standard battery is much thinner than the Extended battery.

Each battery will fit in the battery sleeve on an armband and the voice case.

Note: Do not allow water or chemical cleaning agents of any kind to come in contact with the battery charging contacts or the battery cable connector; they may be damaged. If necessary, clean them with a soft-bristle, dry brush or compressed air.

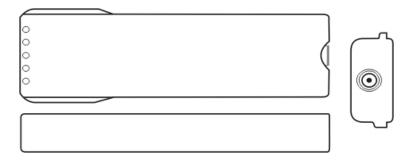

Battery Connectors

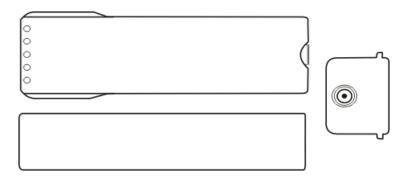

- 1. Battery Charge/Connect Terminals
- 2. Battery Cable Connector

Note: When placing the tethered battery in an armband or hip flip battery sleeve, ensure the Battery Charge/Connect terminals are protected from accidental damage by keeping them covered by the sleeve fabric at all times.

Standard Battery

Extended Battery

Chapter 2: Set Up A New HX3

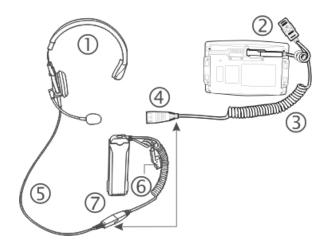

This page lists a quick outline of the steps you might take when setting up a new HX3. More instruction for each step is listed later in this guide. Please refer to the HX3 Reference Guide for additional information and instruction.

Contact Technical Assistance if you need additional help.

Note: Installing or removing accessories should be performed on a clean, well-lit surface. When necessary, protect the work surface, the HX3, and components from electrostatic discharge.

Note: Although the HX3 has no display or alphanumeric keypad, HX3 operating system screens can be viewed and parameters manipulated using LXEConnect and ActiveSync on a connected desktop/laptop computer.

Quick Start - Assembly

- 1. Headset
- 2. To Battery
- 3. Audio Cable
- 4. To Headset Cable
- 5. Headset Cable
- 6. To HX3
- 7. Battery

- 1. Put the headset on.
- 2. Connect the headset cable to the audio connector and battery connection cable.
- 3. Connect the audio connector and battery connection cable to the battery.
- 4. Connect the audio connector and battery connection cable to the HX3.

Voice Case Assembly

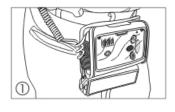

The voice case is a sturdy, lightweight covering for the HX3, tethered battery, and voice accessories. The voice case cannot protect the HX3 from destructive, excessive force or a harsh or wet environment. It is designed to protect the HX3 from dirt, dampness, and minor, trivial bumps.

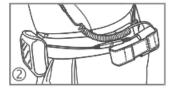

Procedure

- 1. Slide the belt through the belt loop on the voice case. Do not put the belt on yet.
- 2. Attach the battery cable, ring scanner, if used, and audio headset to the HX3.
- 3. Slip the HX3 into the voice case. *Enclosed voice case*: Be sure the screen and keypad are visible through the clear window of the voice case.
- 4. Slide the battery cable through the protective loop at the bottom of the voice case. Make sure the tethered cable for the ring accessory is on the outside of the voice case.
- 5. Slip the battery into the battery sleeve and connect the battery to the battery cable. The battery charge terminals (small metallic circles) should always be covered by the sleeve.
- 6. Press the hook and loop fabric at the top of the device together.
- 7. The HX3 in the Voice Case is ready for use.
- 8. Put the belt on. Adjust the belt and voice case for comfort.

Examine the tethers and the hook and loop fabric fastening periodically. If any are loose or unfastened, tighten the tethers and the top fastener before placing the voice case back into service. If the voice case is damaged, it should be removed from service.

An HX3 with a voice case does not fit in the HX2 cradle. Remove the voice case before placing the HX3 in the cradle.

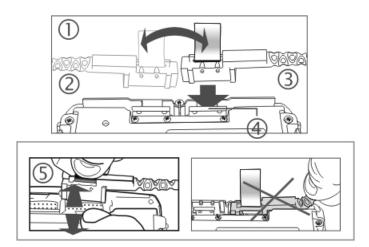

- 1. Standard Battery Placement
- 2. Alternative Battery Placement

Connect the Ring and Battery Cables

The battery cable and the ring scanner/imager cable should not be exchanged or replaced in a dirty, harsh or hazardous environment. When the tethers are disconnected, any dust or moisture that adheres to the tether connector can potentially cause damage upon cable re-connection.

Battery

Note: The HX3 cannot function unless a battery is securely tethered. Be sure to place the HX3 in Suspend mode before disconnecting a battery, or all unsaved data may be lost.

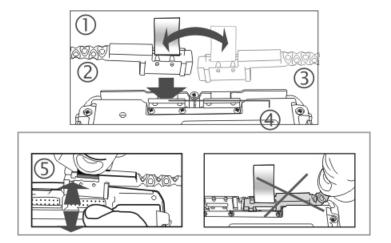

- 1. Connect
- 2. Armband Right Arm
- 3. Armband Left Arm
- 4. Press Down
- 5. Remove

When you want to switch connectors from left to right, or vice versa, first gently press downward on the Retaining Clip, then pinch and pull the cable connector (not the cable!) straight up and away from the HX3. Do not use a metal object, or extreme force, to remove the cable connector from the HX3.

Re-connect cables and reassemble the HX3 body-worn components.

Ring Scanner/Imager

- 1. Connect
- 2. Ring on Left Hand
- 3. Ring on Right Hand
- 4. Press Down
- 5. **Remove**

When you want to switch connectors from left to right, or vice versa, first gently press downward on the Retaining Clip, then pinch and pull the cable connector (not the cable!) straight up and away from the HX3. Do not use a metal object, or extreme force, to remove the cable connector from the HX3.

Re-connect cables and reassemble the HX3 body-worn components.

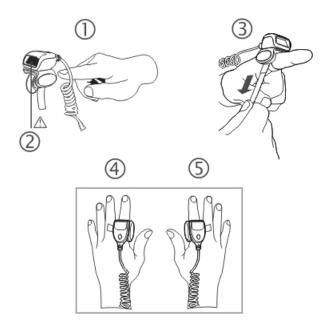

Attach Ring to Finger

The ring finger loop is located under the ring assembly.

Pull gently on the end of the finger loop strap to separate the hook and loop fabric. Slide your finger into the opened loop under the ring scanner. Grasp the end of the finger loop strap and loosen, then tighten, the finger strap until the ring scanner is comfortably snug and the scan aperture is secured in the desired location.

The ring scanner has a built-in quick disconnect designed for occasional safety hazards. It is not intended for frequent, normal removal of the ring scanner from the hand.

Note: Do not touch, push against or brace your finger on the scan aperture at any time.

- 1. Slide finger into opened loop
- 2. Remove shipping film on scan aperture before first scan
- 3. Tighten the finger loop strap
- 4. Ring worn on left hand
- 5. Ring worn on right hand

Status LEDs

LEDs (Light Emitting Diodes) are located on the front of the HX3. They are:

- 1. System Status LED indicates power management status.
- 2. Wireless Activity LED.
- 3. Bluetooth Status LED applies to Bluetooth client functions.

System Status LED

Blinking Red	Main battery power fail; critical suspend mode
Steady Red	Main battery low. If the main battery is not replaced with a fully charged battery before the internal battery fails, the HX3 is turned Off.
Blinking Green	The HX3 is On and attached to either a battery with a good charge or to an external power source.
Steady Green	The HX3 is booting up.
Off	HX3 is Off (both batteries depleted) or the HX3 is in Suspend mode

Bluetooth Status LED

Blinking Slowly	Bluetooth is paired but not connected to a device.
Blinking Medium	Bluetooth is paired and connected to a device.
Blinking Fast	Bluetooth is discovering Bluetooth devices.
Off	Bluetooth hardware has been turned off or it does not exist in the HX3.

Wireless Activity

Flickering Amber	HX3 is booting up.
Steady Amber	The HX3 is connected to a wireless network.
Off	The HX3 has not connected to a wireless network.

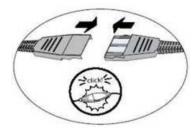

Connecting the Headset Cable

Headset

- 1. Microphone
- 2. Headphones
- 3. Connects to voice cable end of voice cable

Connect the HX3 voice cable I/O connector to the I/O port on the HX3. The HX3 internal microphone and speaker are automatically disabled.

Slide the voice cable ends together until they click shut. Do not twist or bend the connectors.

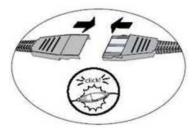

The HX3 is ready for voice-enabled applications.

Adjust Headset / Microphone and Secure Cable

The headset consists of an earpiece, a microphone, a clothing clip and a cable. The headset attaches to the audio cable end of the voice cable which attaches to the HX3.

Align the audio connector and the headset quick connect cable end. Firmly push the cable ends together until they click and lock in place.

Do not twist the microphone boom when adjusting the microphone. The microphone should be adjusted to be about two finger widths from your mouth.

Make sure the microphone is pointed at your mouth. Note the small "Talk" label near the mouthpiece. Make sure the Talk label is in front of your mouth. The microphone cable can be routed over or under clothing.

Under Clothing

- Leave the cable exposed only at the top of the collar.
- Be sure to leave a small loop of cable to allow movement of your head.

Over Clothing

- Use clothing clips to hold the cable close to your body.
- Tuck the cable under the belt, but leave a small loop where it goes under the belt.
- Do not wear the cable on the front of your body. It may get in your way or get caught on protruding objects.

Connect / Disconnect Battery

Note: The HX3 will not function unless a battery is securely tethered. When the HX3 is placed in a powered cradle, the connection between the tethered battery and the HX3 is broken, and the HX3 is receiving power through the cradle-HX3 connector.

Be sure to place the unit in Suspend Mode before removing the battery. Failing to properly place the device in Suspend mode will result in a loss of all unsaved data.

An HX3 will retain data, while the main battery is removed and replaced with a fully charged main battery, for 5 minutes. **Important:** When the internal battery power is Low or Very Low connect the AC adapter to the HX3 before replacing the main battery.

Note: The battery should not be replaced in a dirty, harsh or hazardous environment. When the battery is not connected to the HX3, any dust or moisture that enters the battery well or connector may transfer to the battery/well terminals, potentially causing damage.

Warning. Only use Honeywell batteries as replacements:

Connect Battery

To connect the main battery, complete the following steps:

- 1. Hold the battery with one hand with the connector facing up.
- 2. With the other hand, press the battery cable connector down onto the battery connector, making sure the connectors line up.

The HX3 draws power from the battery immediately upon successful connection.

Check battery status by tapping the Start > Settings > Control Panel > Battery icon. Main battery level, internal battery level, status and other details are displayed.

Disconnect Battery

To remove the battery cable from the HX3, first press downward on the Retaining Clip, then pinch and pull the cable connector straight up and away from the HX3. Do not use a metal object, or extreme force, to remove the cable connector from the HX3. Re-connect cables and reassemble the HX3 body-worn components.

Place the discharged battery pack in a powered battery charger.

Set Date and Time Zone

Tap Start > Settings > Control Panel > Date/Time icon

Set Date, Time, Time Zone, and assign a Daylight Savings location on the HX3 after a warm boot or anytime.

There is very little functional change from standard desktop PC Date/Time Properties options. Adjust the settings and tap the OK button or the Apply button to save changes to the registry. Any changes take effect immediately.

Double-tapping the time displayed in the Taskbar causes the Date/Time Properties screen to appear.

Using the Input Panel / Virtual Keyboard

The virtual keyboard is always available when needed e.g., text entry.

Place the cursor in the text entry field and, using the stylus:

- Tap the Shift key to type one capital letter.
- Tap the CAPS key to type all capital letters.
- Tap the áü key to access symbols.

Some applications do not automatically display the Input Panel. In this case, do the following to use the Input Panel:

• Move the cursor into the text entry field when you want to enter data using the Input Panel.

When finished entering data, tap the icon in the Taskbar again.

Set Speaker Volume

The speaker is on the front, above the white key.

Speaker volume can be adjusted to a comfortable level for the listener by using the keypad or by changing parameters in the Volume & Sounds control panel.

Using the Keypad

Note: Volume & Sounds (in Settings > Control Panel) must be enabled before the following key sequences can adjust the volume.

The volume is increased or decreased one step each time the volume key sequence is pressed.

To adjust speaker volume use the Blue+White keys and Blue+Green keys to adjust volume until the speaker volume is satisfactory.

Volume control using a keypad key press has six volume settings that match those supported by the Volume and Sounds Control panel. Volume does not "roll-over" from minimum to maximum or from maximum to minimum. Continuously holding down the up or down arrow keys does not cause an automatic repeat of the up (or down) arrow key.

Using the Control Panel

Note: When the HX3 is connected via ActiveSync to a PC running LXEConnect, the Volume and Sounds option in the Control Panel can be used to adjust volume.

Tap **Start > Settings > Control Panel > Volume & Sounds > Volume** tab. Change the volume setting and tap OK to save the change.

You can also select / deselect sounds for key clicks and screen taps and whether each is loud or soft.

As the volume scrollbar is moved between Loud and Soft, the HX3 emits a tone each time the volume increases or decreases.

Connecting Bluetooth Devices

Before connecting to Bluetooth Devices:

- The system administrator has discovered, paired, connected and disconnected (using LXEZ Pairing Control Panel) Bluetooth devices for each HX3.
- The system administrator has enabled and disabled LXEZ Pairing parameters for the HX3.
- The system administrator has also assigned a Computer Friendly Name using LXEZ Pairing Control Panel for the HX3.

To connect Bluetooth devices, the HX3 should be as close as possible and in direct line of sight (distances up to 32.8 feet or 10 meters) with the targeted Bluetooth device during the discovery and pairing process.

If the devices are in Suspend, tap the power key to wake the HX3.

Using the correct procedure, wake the targeted Bluetooth device if necessary.

There may be audible or visual signals as both devices discover and pair with each other.

Taskbar Connection Indicator

HX3 is connected to one or more of the targeted Bluetooth device(s).

HX3 is not connected to any Bluetooth device.

HX3 is ready to connect with any Bluetooth device.

HX3 is out of range of all paired Bluetooth device(s). Connection is inactive.

LED Connection Indicator

When the Bluetooth LED on the HX3 is off, Bluetooth hardware has been turned off or it does not exist in the HX3.

When the Bluetooth LED on the HX3 is on:

- the HX3 is paired with another Bluetooth device but is out of range or not connected, or
- is paired and connected to another Bluetooth device, or
- is discovering other Bluetooth devices.

The Bluetooth LED

- Blinks slowly (Bluetooth LED is on for one second, off for five seconds) when it is idle.
- Blinks quickly (Bluetooth LED is on for 1/4 second, off for 2 seconds when the HX3 is discovering other Bluetooth devices.
- And blinks normally (Bluetooth LED is on for 1/2 second, off for 1/2 second) when it is connected.

There may be audible or visual signals from paired devices as they move back into range and re-connect with the Bluetooth hardware in the HX3.

Reboot

When the Windows desktop is displayed or an application begins, the power up (or reboot) sequence is complete.

Note: Although the HX3 has no display or alphanumeric keypad, HX3 operating system screens can be viewed and parameters manipulated using LXEConnect and ActiveSync on a connected desktop/laptop computer.

Warm Boot

Start > Run

A warm boot function does not affect the operating system, but data and programs in RAM are cleared, and registry changes, if any, are saved. Network, ActiveSync and Bluetooth connections will need to be re-established.

Tap **Start > Run** and type WARMBOOT. EXE or WARMBOOT. This command is not case sensitive. Tap the OK button. This process takes less than 15 seconds. Temporary data not saved is lost.

The warmboot terminates the ActiveSync connection. The ActiveSync connection must be re-established after the HX3 boots.

Note: There may be slight delays while the wireless client connects to the network, re-authorization for voice-enabled applications completes, Wavelink Avalanche management of the HX3 startup completes, or Bluetooth relationships establish or re-establish.

Startup Help

Contact Technical Assistance if you need more help.

HX3 seems to lockup as soon as it is rebooted.	There may be slight delays while the wireless client connects to the network, authorization for voice-enabled applications complete, Wavelink Avalanche management of the HX3 startup completes, and Bluetooth relationships establish or re-establish. When an application begins, the HX3 is ready for use.
New HX3 main batteries don't last more than a few hours.	New batteries must be fully charged prior to first use. Li-lon batteries (like all batteries) gradually lose their capacity over time (in a linear fashion) and never just stop working. This is important to remember – the HX3 is always 'on' even when in the Suspend state and draws battery power at all times.

Continuous Scan Mode

If Continuous Scan Mode has been enabled (factory default setting is 'Disabled'), the laser (or imager) is always on and decoding.

Caution: Laser beam is emitted continuously. Do not stare into the laser beam.

Chapter 3: Product Agency Compliance - HX3

Class B Digital Device

FCC Rules, Part 15

This device complies with Part 15 of the FCC Rules [and with RSS-210 of Industry Canada]. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference, and
- 2. This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Notice

Changes or modifications made to this equipment not expressly approved by Honeywell may void the FCC authorization to operate this equipment.

EMC Directive Requirements

This is a Class B product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Industry Canada

This Class B digital apparatus meets all requirements of the Canadian Interference Causing Equipment Regulations. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada. Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de Classe B prescrites dans le Règlement sur le brouillage radioélectrique édits par le ministère des Communications du Canada.

Waste Electrical and Electronic Equipment (WEEE)

Important:

This symbol is placed on the product to remind users to dispose of Waste Electrical and Electronic Equipment (WEEE) appropriately, per Directive 2002-96-EC. In most areas, this product can be recycled, reclaimed and reused when properly discarded. Do not discard labeled units with trash. For information about proper disposal, visit www honeywellaidc com.

RF Notices

This device contains transmitter Module FCC ID: KDZLXE4830P

RF Safety Notice (Summit Client - 4830)

Caution:

This portable device with its antenna complies with FCC and Industry Canada RF exposure limits set for an uncontrolled environment. This equipment has shown compliance with FCC and Industry Canada Specific Absorption Rate (SAR) limits. Highest reported SAR for the HX3 is 0.641W/kg on body. Any accessories not provided by Honeywell should not be used with this device. This device must not be co-located or operating in conjunction with any other antenna or transmitter.

This device contains transmitter Module FCC ID: KDZLXE4831P

RF Safety Notice (Summit Client - 4831)

Caution:

This portable device with its antenna complies with FCC and Industry Canada RF exposure limits set for an uncontrolled environment. This equipment has shown compliance with FCC and Industry Canada Specific Absorption Rate (SAR) limits. Highest reported SAR for the HX3 is 0.333W/kg on body. Any accessories not provided by Honeywell should not be used with this device. This device must not be co-located or operating in conjunction with any other antenna or transmitter.

R&TTE Directive Requirements

Dealer License - Republic of Singapore

Complies with IDA Standards DA103458

Republic of Singapore - LXE Dealer License Number DA103458 complies with IDA Standards.

Laser Light Safety Statement

Warning: This product uses laser light. One of the following labels is provided on the scanner. Please read the Caution statement. (US)

Mise én garde: Ce produit utilise un rayon laser. L'une des étiquettes suivantes est apposée sur le scanneur. Veuillez lire l'avertissement qu'elle contient. (FR)

Important Safety Warnings - Desktop Cradle

SAVE THESE INSTRUCTIONS

This document contains important safety and operating instructions for the HX3 Desktop Cradle. Please read all instructions and cautionary markings on the Desktop Cradle itself before putting the unit into service.

Safety Alert Symbols

This symbol is used to call your attention to instructions concerning your personal safety. Watch for this symbol – it will alert you to important safety precautions that must be observed to avoid death, personal injury or property damage. Follow the instructions after the warning symbol and be alert to the possibility of personal injury or death.

These signal words provide users with information about the seriousness of the hazard involved:

DANGER	WARNING	CAUTION
Indicates imminent hazards which,	Indicates potential hazards which, if	Indicates hazards or unsafe practices which, if
if not avoided, WILL result in	not avoided, COULD result in	not avoided, COULD result in minor or moderate
severe personal injury or death.	severe personal injury or death.	personal injury or property damage.

SAFETY INSTRUCTIONS

Setting up the Desktop Cradle

Locate or orient the AC cord so that it will not be stepped on, tripped over or subjected to damage or stress.

CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.

Analyze or charge only Honeywell HX2A301BATTSTD / 160289-0001 or HX2A302BATTEXT / 160320-0001 Rechargeable Lithium Ion Battery Packs in this Desktop Cradle. Other batteries or battery packs may burst causing injury or property damage.

Operating the Desktop Cradle

Only users who have read and understand all operating instructions are qualified to operate the Desktop Cradle. Failure to read, understand and follow safety instructions may result in injury or death.

Keep the Desktop Cradle away from any heat source. Excessive internal heating can ruin the Desktop Cradle.

Use care when inserting battery. Do not "slam" or slide the battery into the pocket, this could damage the Desktop Cradle.

Keep dirt and foreign objects out of the battery pocket. Do not short circuit any of the contacts in the battery pocket, this could result in injury or property damage.

Do not operate the Desktop Cradle if it has been dropped or damaged in any way. Return the Desktop Cradle to Honeywell for repair.

Storing the Desktop Cradle

Disconnect Desktop Cradle from the AC power source by pulling the plug; not the cord.

Maintaining the Desktop Cradle

Service should be performed by trained persons only. Return the Desktop Cradle to Honeywell.

Caring for Batteries

Do not dispose of batteries into a fire. Burning will generate hazardous vapors and may cause the battery to explode. Failure to observe this warning may result in injury from inhalation of vapors or burns from flying debris.

Do not immerse batteries in water or any other liquid. Contact Technical Assistance for assistance if batteries are immersed.

Do not disassemble or perform modifications to the battery. There are no user serviceable components in the battery.

Do not place battery into pocket or toolbox with conductive objects (coins, keys, tools, etc.).

A battery placed on damp ground or grass could be electrically shorted. Lay the battery on its side when not in use.

Do not store batteries above 140°F (60°C) for extended periods.

Failure to observe these warnings could result in injury or damage to the battery from rapid discharge of energy or overheating of the battery.

Electrical Shock Hazards

The following precautions should be observed to avoid the risk of electrical shock hazards associated with charging batteries:

The Desktop Cradle has been designed for indoor use only. Do not operate outdoors or in extremely high humidity environments. Do not expose Desktop Cradle to rain, snow or wet conditions.

Unplug the Desktop Cradle from power source before cleaning. Use only mild detergent with a slightly damp cloth to clean the outside of the Desktop Cradle. Do not use solvents or flammable cleaners. Allow the case to dry fully before using again.

Use of attachments or accessories not recommended by Honeywell could result in fire, electric shock or injury.

This appliance must be properly grounded. If it should malfunction or break down, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This appliance is equipped with a cord having an equipment grounding conductor and ground outlet that is properly installed and grounded in accordance with all local codes and ordinances. Do not operate the Desktop Cradle with a damaged AC cord or plug. Honeywell does not recommend the use of any extension cord with the Desktop Cradle.

The Desktop Cradle has been designed for use on a nominal 100 or 120 volt or nominal 220 or 240 volt circuit and has a grounding attachment plug. The plug is an IEC configuration that is appropriate for your country and regulations. Make sure that the appliance is connected to an outlet having a configuration similar to the plug. No adapter should be used with this appliance. Improper connection of the equipment-grounding conductor can result in a risk of electric shock.

Check with a qualified electrician or service person if you are in doubt as to whether the outlet is properly grounded. Do not modify the plug provided with the appliance. If it will not fit in the outlet, have a proper outlet installed by a qualified electrician.

Do not disassemble the Desktop Cradle. It contains no user serviceable parts.

Chapter 4: Technical Assistance

If you need assistance installing or troubleshooting your device, please contact us by using one of the methods below:

Knowledge Base: www.hsmknowledgebase.com

Our Knowledge Base provides thousands of immediate solutions. If the Knowledge Base cannot help, our Technical Support Portal (see below) provides an easy way to report your problem or ask your question.

Technical Support Portal: www.hsmsupportportal.com

The Technical Support Portal not only allows you to report your problem, but it also provides immediate solutions to your technical issues by searching our Knowledge Base. With the Portal, you can submit and track your questions online and send and receive attachments.

Web form: www.hsmcontactsupport.com

You can contact our technical support team directly by filling out our online support form. Enter your contact details and the description of the question/problem.

Telephone: www.honeywellaidc.com/locations

For our latest contact information, please check our website at the link above.

Product Service and Repair

Honeywell International Inc. provides service for all of its products through service centers throughout the world. To obtain warranty or non-warranty service, please visit www.honeywellaidc.com and select Support > Contact Service and Repair to see your region's instructions on how to obtain a Return Material Authorization number (RMA #). You should do this prior to returning the product.

Limited Warranty

Honeywell International Inc. ("HII") warrants its products to be free from defects in materials and workmanship and to conform to HII's published specifications applicable to the products purchased at the time of shipment. This warranty does not cover any HII product which is (i) improperly installed or used; (ii) damaged by accident or negligence, including failure to follow the proper maintenance, service, and cleaning schedule; or (iii) damaged as a result of (A) modification or alteration by the purchaser or other party, (B) excessive voltage or current supplied to or drawn from the interface connections, (C) static electricity or electro-static discharge, (D) operation under conditions beyond the specified operating parameters, or (E) repair or service of the product by anyone other than HII or its authorized representatives.

This warranty shall extend from the time of shipment for the duration published by HII for the product at the time of purchase ("Warranty Period"). Any defective product must be returned (at purchaser's expense) during the Warranty Period to HII factory or authorized service center for inspection. No product will be accepted by HII without a Return Materials Authorization, which may be obtained by contacting HII. In the event that the product is returned to HII or its authorized service center within the Warranty Period and HII determines to its satisfaction that the product is defective due to defects in materials or workmanship, HII, at its sole option, will either repair or replace the product without charge, except for return shipping to HII.

EXCEPT AS MAY BE OTHERWISE PROVIDED BY APPLICABLE LAW, THE FOREGOING WARRANTY IS IN LIEU OF ALL OTHER COVENANTS OR WARRANTIES, EITHER EXPRESSED OR IMPLIED, ORAL OR WRITTEN, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. OR NON-INFRINGEMENT.

HII'S RESPONSIBILITY AND PURCHASER'S EXCLUSIVE REMEDY UNDER THIS WARRANTY IS LIMITED TO THE REPAIR OR REPLACEMENT OF THE DEFECTIVE PRODUCT WITH NEW OR REFURBISHED PARTS. IN NO EVENT

SHALL HII BE LIABLE FOR INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, AND, IN NO EVENT, SHALL ANY LIABILITY OF HII ARISING IN CONNECTION WITH ANY PRODUCT SOLD HEREUNDER (WHETHER SUCH LIABILITY ARISES FROM A CLAIM BASED ON CONTRACT, WARRANTY, TORT, OR OTHERWISE) EXCEED THE ACTUAL AMOUNT PAID TO HII FOR THE PRODUCT. THESE LIMITATIONS ON LIABILITY SHALL REMAIN IN FULL FORCE AND EFFECT EVEN WHEN HII MAY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH INJURIES, LOSSES, OR DAMAGES. SOME STATES, PROVINCES, OR COUNTRIES DO NOT ALLOW THE EXCLUSION OR LIMITATIONS OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

All provisions of this Limited Warranty are separate and severable, which means that if any provision is held invalid and unenforceable, such determination shall not affect the validity of enforceability of the other provisions hereof. Use of any peripherals not provided by the manufacturer may result in damage not covered by this warranty. This includes but is not limited to: cables, power supplies, cradles, and docking stations. HII extends these warranties only to the first end-users of the products. These warranties are non-transferable.

Note: The HX3 is docked in the HX2-labeled Cradle. The HX3 batteries are re-charged using the HX2-labeled cradle and the HX2-labeled Battery Charger.

The duration of the limited warranty for the HX3 is 1 year.

The duration of the limited warranty for the HX3 Desktop Cradle is 1 year.

The duration of the limited warranty for the HX3 Battery Charger is 1 year.

The duration of the limited warranty for the HX3 2000mAh Li-lon and 4000mAh Li-lon Battery is 6 months.

The duration of the limited warranty for the HX3 Ring Scanner and Ring Imager is 1 year.

The duration of the limited warranty for the HX3 AC power supply and cables is 1 year.

The duration of the limited warranty for the HX3 cables (USB, Serial, Communication, Power) is 1 year.

The duration of the limited warranty for the HX3 fabric accessories (e.g., belt, case, straps) is 90 days.
