# MioCARE<sup>+</sup>

## Z100

**1** Unified Communication  
Integrated camera and microphone for real-time collaborative communication.

**2** Slim and Lightweight  
The MioCARE Z100 was designed after extensive research into the correct width, height and weight for a device to be held in one hand. The result is a real handheld device that can be comfortably carried and used throughout the day.

**3** Flexible and Programmable  
Mio is available to help integrate your own apps and solutions to the MioCARE environments providing you with full flexibility around your clinical pathways and collaboration tools. This allows the device to be used with solutions including logistics tracking and dictation.

**4** Pocket sized with big solutions  
Ergonomically designed tablet developed for healthcare environments. The innovative handheld, that's responsive and light with healthcare led deployment solutions to improve clinical workflow.
