MioCARE

A105

1D/ 2D Barcode Reader

Capture, track and trace

The integrated Opticon barcode scanner provides positive patient identification to track and capture assets within workflows reducing the time taken for data entry.

Secure environment

Mio have developed a suite of complementary solutions to provide varying security options. These range from full two factor smartcard authentication and access logging to simple log on solutions for non clinical use.

Flexible & Programmable

Mio is available to help integrate your own apps and solutions to the MioCARE environments providing you with full flexibility around your clinical pathways and collaboration tools. This allows the device to be used with solutions including logistics tracking and dictation.

Pocket-sized with big solutions

Ergonomically designed tablet developed for healthcare environments. The innovative handheld that's responsive and light with healthcare led deployment solutions to improve clinical workflow.
