# Support services

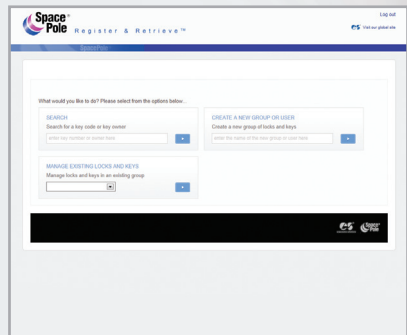

## We understand the impact a lost key can have

Ergonomic Solutions understand technology and technology integration and we also understand the physical security requirements of these valuable assets. By facilitating effective deployment of your locks and keys throughout your organisation you will maximise the benefit of your investment in your SpacePole ClickSafe solutions.

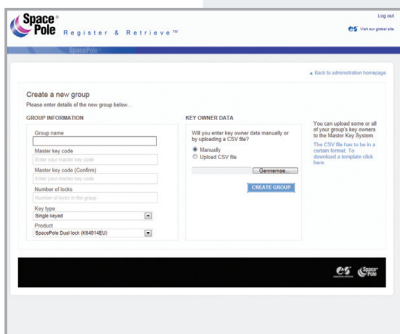

### 1. Register

Create your account online and log in

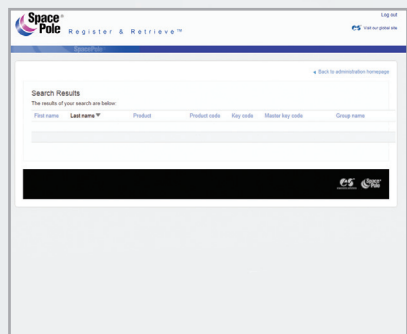

### 2. Manage

Manage your locks and keys from the options in the user panel

### 3. Group

Group sets of locks and keys by entering your key details and owner data

### 4. Retrieve

Log on to SpacePole Register & Retrieve to retrieve lost keys. This service is free

# Key management suite

SpacePole Register and Retrieve empowers administrators to manage their key programmes and ensure staff benefit from our support services without needing to contact their administrator.

## Smart

It is smarter for an organisation that wants to ensure its assets are recorded and available following personnel change.

## Safe

It is safer for the user as they are provided with their own unique account.

## Simple

It is simpler for the administrator as it provides a single portal for the management of all keys.

### Allows administrators to:

- a. Register keys individually or en-mass to individuals or groups
- b. Manage Standard Single Keyed solution programmes
- c. Manage Custom Keyed solution programmes
- d. Create user accounts for their end users where replacement keys can be ordered or combination codes saved
- e. Prompt users to validate their account details
- f. Record key ownership and download reports
- g. Locate owners of lost keys
- h. Reassign locks to new users

### Allows individuals to:

- a. Order replacement keys
- b. Retrieve stored combination codes
- c. Validate account and keycode details
- d. Update their personal details

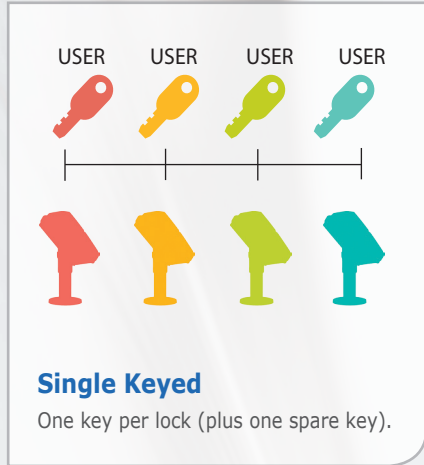

# Standard solution - Single Keyed

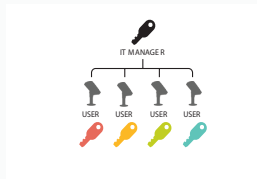

**Not all organisations are the same,  
nor are our key options.**

The SpacePole ClickSafe comes with the single keyed option as standard; one key per lock.

The Custom Keyed Solutions below provide exactly the level of control over your hardware that you want whilst helping employees safeguard against internal theft and reduce downtime caused by misplaced keys.

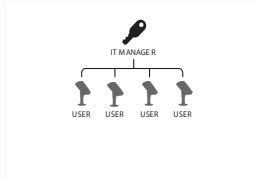

## Custom keyed solutions

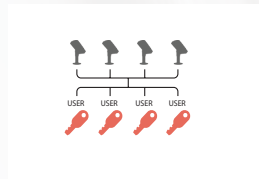

### Master Keyed

Equip employees with personal keys to protect your technology — all while retaining universal access for your IT staff.

### Supervisor Keyed

Implement restricted lock management at your organisation. Protect business technology with locks that are only accessible with one master key for ultimate control and access.

### Keyed Alike

Protect your shared equipment from theft while giving employees the access they need to be productive, using shared, identical locks and keys.
