

# WorkForce DS-780N

Intelligent, secure business scanner with built-in networking and smart features for fast, high-volume scanning and circulation.

The WorkForce DS-780N is Epson's most intelligent business scanner yet, an interactive sheet-fed touchscreen model with built-in networking to make sharing documents easy, and a host of innovative features to ensure maximum security, control and document-handling versatility.

## Fast, high-volume scanning

The DS-780N is designed for high-volume network scanning, with a 100-sheet automatic document feeder (ADF), very fast colour scanning speeds of 45ppm/90ipm at 300dpi, and USB 3.0 to enable direct-to-PC connection.

## Smart features improve workflow

Innovative features make scanning easy, including industry first slow mode<sup>1</sup> for delicate documents and double-feed detection skip to allow scanning of items such as envelopes and documents with Post-its. An intuitive colour LCD touchscreen panel makes scanning easy, and allows job creation without accessing a computer.

## Built-in networking and security features

The DS-780N with built-in networking is the perfect solution for creating a scanner fleet. Epson's Document Capture Pro 2.0<sup>2</sup> software offers complete control and security, allowing job, group, device and access protocols to be managed centrally. User authentication can be enabled via pin code, third-party IC card or user directory (LDAP), with a lockable control panel to prevent tampering. Pre-defined job profiles help ensure scans are sent to the correct locations.

## Usage reports and maintenance alerts

Using Epson Device Admin or Document Capture Pro Server, the DS-780N can alert the administrator if it needs maintenance, and provides detailed usage reports showing which devices are used most and how many scans they've made, for effective fleet management.
