podloc

Keep mobile devices work ready and stop asset shrinkage. **Overnight.**

Podloc is a unique all-in-one solution for securing, charging, and managing your rugged enterprise mobile devices.

Are your mobile devices always lost, stolen, damaged, or flat?

Solve all these issues in one neat, modular solution: Podloc. It has the power to **put a stop to mobile device asset shrinkage overnight.**

Averaging over 15% in a typical workplace, asset shrinkage can cause significant losses financially and affect workplace productivity.

With Podloc, you can recoup those losses quickly as it offers **one of the fastest ROIs for a charging solution.**

Lock

Keep devices locked away securely and accessed by authorised users only.

Charge

Enjoy fully charged devices straight out of the locker, ready to use when you need them.

Manage

Get real-time visibility of the status, user, and charge of each device, 24/7, whilst organising your assets neatly in one place.

Why use Podloc?

Optimise operations

Stored in one place, it's easy for staff to find a device, cutting down wasted time. Ensuring devices are charged can extend their battery life and keep them ready for the next shift.

Save money

Podloc reduces constant expenditure on replacing missing devices, and is more competitively priced than its nearest counterpart, leading to a superfast return on investment.

Manage space effectively

Charging your devices can leave you with a mess of cables and no countertop space. Offering one of the smallest footprints in the industry, Podloc saves space, protects devices, and keeps cables organised.
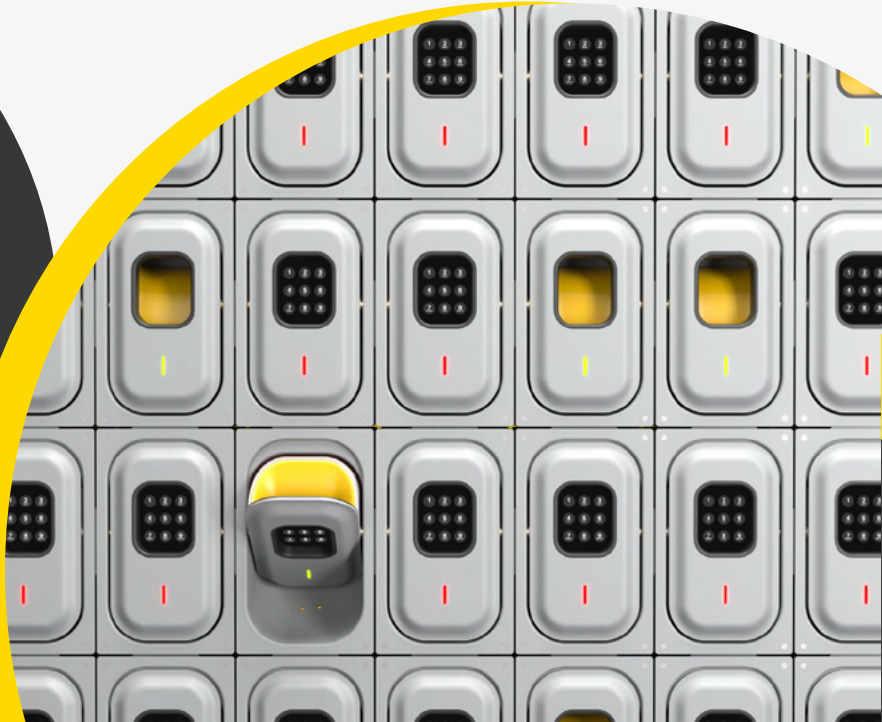

Increase staff accountability

Devices are traceable with Podloc, not only helping to deter theft and loss but also enabling workers to self-serve and be held accountable for returning their devices.

> **"This is saving us so much time and money on lost devices."**
