
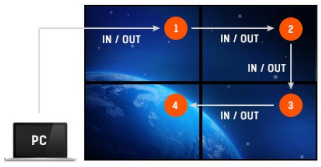
43” Android-powered professional digital signage display with daisy chain function

The 43” LH4346HS-B1 merges the versatility and freedom of an Android OS display with the flexibility of a landscape and portrait orientation to bring you a well-rounded digital signage display you can easily customize to your needs by installing applications directly to it.

It features an IPS panel, Full HD resolution, a continuous 24/7 operating time, a media player and a full range of connectors - VGA, DVI, HDMI and DisplayPort. Daisy Chain function makes the screen suitable for use in a wide variety of environments and set-ups including video walls.

Android OS

Thanks to Android OS, you can easily customize the display to your needs by installing applications directly to it.



Daisy Chain Support

Daisy chain is a connection scheme in which several devices are connected in sequence or in a ring. It enables a connection of a series of devices using a single connection between each two devices via a cable. The signal output is connected to the signal input of the next device. The connection with only one cable between two devices ensures a simple and tidy installation.
