

TEMPERED GLASS

THE MOST SCRATCH RESISTANT SCREEN PROTECTOR

3 finishes available : Clear, Matte and Privacy

KEY POINTS

- **Strenght** : Tempered Glass 9H hardness norm makes it **the most resistant screen protector in front of scratch**.
- **User experience** : The **best user experience**, with a glass touch which facilitate the use and allows you to **fully enjoy all fonctionnalities** of your device.
- **In front of any impact** : Real fuse against screen break. Its role is to break **absorbing the impact to protect your device screen**.

How to choose your finish ?

You need optimal visibility : Clear is a transparent finish without any filter between the screen and the eye.

You use your device outdoors, or don't want to see fingerprints anymore : The Matte finish removes bothersome light reflections. Its satin finish make fingerprints invisible and keeps your screen clean longer.

You have confidential data ? : Prying, or simply curious, gazes fall constantly on your screens. The privacy filter allows you to work on important files anywhere by turning the screen black for people who stand next to you, while leaving more than 80% visibility for the user. How to choose your finish.

More than 2000 references available for smartphones, tablets, hybrid Pcs, notebooks...

9H Hardness Anti-Scratch

9H grade takes place on the top-level of a hardness scale just before diamond and determines resistance to touch, pressure, shearing, friction and shock.

IK03 norm protection

The IK standard determines the level of protection against mechanical impacts, according to the NF EN 62262 norm (NF C 20-015)

Why a screen protector ?

91% of users have already broken a screen !

On average a screen costs :

- 500 € for a laptop
- 200 € for a tablet
- 100 € for a smartphone

Protecting the device 100% of the time increases its lifespan and thus improves the Total Cost of Ownership !
