

Hand sanitiser holder

Safeguarding customers and staff

APPLICATIONS

- Safeguarding customers in a variety of retail environments
- High footfall checkout lanes
- Hygiene-sensitive work environments for staff
- Busy public spaces where sanitisation is important

BENEFITS

- Enhanced hygiene at a time of heightened sensitivity
- Increased customer confidence in the duty of care offered by the retailer
- Modular design provides minimal installation overhead
- Consistent with existing SpacePole modularity, ergonomics and build-quality
- Compatible with most sanitiser containers with a footprint no wider than 80mm
- Marginal disruption to retail operations and an enhanced customer experience
- Adds value without compromising functionality of your existing POS
- Enhances store loyalty through customer care

The current Corona virus situation has challenged retailers to re-evaluate the safety and productivity of their commercial environments for the immediate and near-term scenarios that isolation and social distancing has presented. Habits of personal hygiene have been highlighted to minimise the effect and distribution of the virus and the wellbeing of customers is an acute focus for retailers wishing to retain and develop the loyalty of customers.

To support this objective, Ergonomic Solutions, creators of the SpacePole range of mounting solutions, are further expanding their portfolio of products to respond to the current COVID-19 epidemic with a hand sanitiser mount.

Available to connect to an existing SpacePole payment plate or as an addition to a larger SpacePole mounting solution, this easily installed dispenser holder provides your customers with a quick and convenient opportunity to sanitise their hands before and after completing their payment transaction.

SpacePole's hand sanitiser dispenser holder has also been designed to be wall mounted, a top-mounted variant for floor stands and fixings to accommodate its need to be mounted on the end of a Swing arm.

Without infringing on the packing or payment areas, this easily accessible module is installed in minutes and complements the SpacePole SafeGuard[®] Screen and extended payment swing arm to provide additional protection for customers, minimise the impact on POS transaction time and enhance your customer care reputation.

SAFEGUARD HAND SANITISER HOLDER
