

TUK 24/40-way Locker

Specifications

traka
ASSA ABLOY

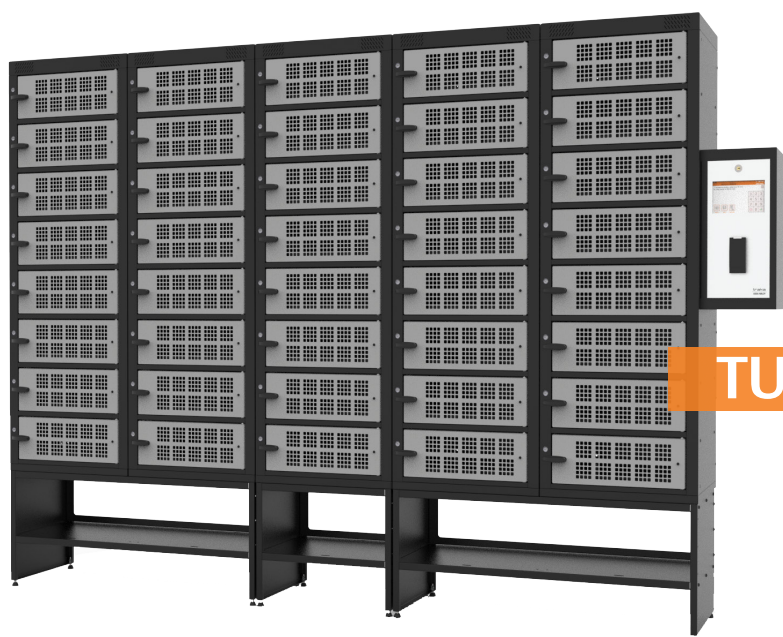

Experience a safer and more
open world

In environments where shared portable equipment is not always treated with respect and is prone to be lost, damaged or mislaid the ability to identify who and when last used a specific piece of equipment, tool or device, can be essential management information.

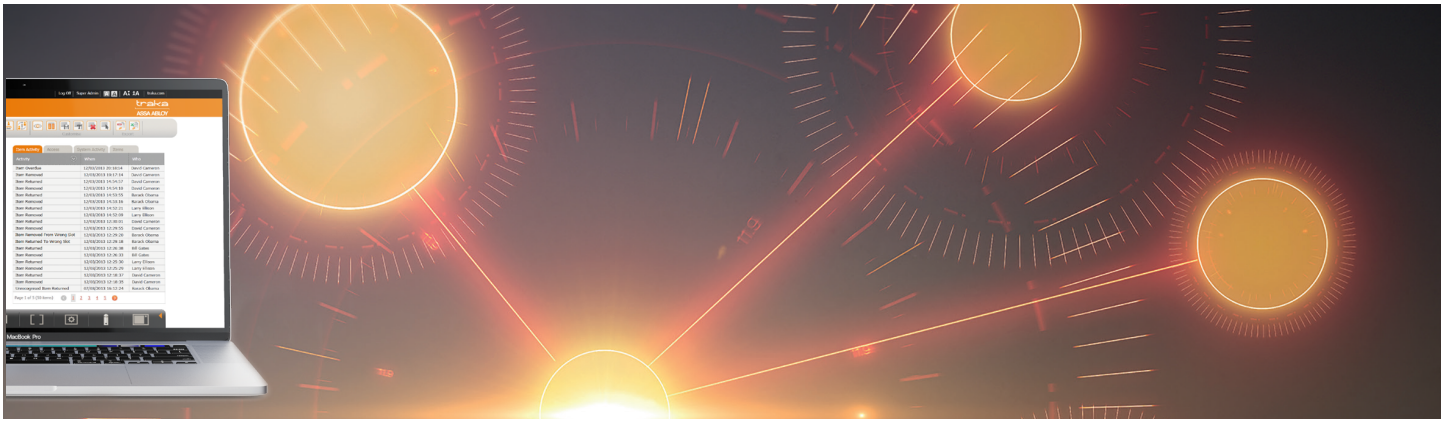

Traka's intelligent locker solutions provide an effective way to control access and track equipment usage, which encourages significantly higher levels of user accountability, resulting in less damage, fewer losses and reduced operating costs for your business.

Features

TrakaWEB enhances your solution with a suite of features that keep you in control, allowing you to improve business processes, make your business run more efficiently and save you time and money.

Allowance Across Systems

Restrict the number of items of a particular type to ensure that users cannot gain access to more than their permitted allowance of items across their network.

Advanced First In First Out (FIFO)

Allow users to select more than one type of item and only take out the permitted allowance, ensuring a fairer and more proportionate use of assets.

Fault Logging

Allow users to record an issue or fault against assets and automatically notify the correct user and restrict access until the necessary repairs are made.

Item Handover

Allows for an item to be removed by a user and handed over to another user while maintaining an audit trail of who the item has been handed over to.

Specifications:

- Browser-based TrakaWEB
- Unique RFID tagging to all compartments as standard to ensure certainty of assets when taken out and whether returned safely. Non-RFID option available upon request
- Access via biometric fingerprint or card reader. Other access methods are available at an additional cost.
- White or orange available as standard colours, other colours available as a cost option
- Charging (via mains or USB) available as a cost option
